

Zodiacverse: Project Blueprint

Core Purpose

Zodiacverse is a Gen Z-focused astrology app that blends zodiac knowledge, daily horoscopes, roast humor, stickers, and Web3 features into one cosmic experience.

Main Features

1. Zodiac Sign Finder: Fun fact + Roast line.
2. Daily Horoscope: Vibe Mode and Roast Me Mode.
3. Compatibility Checker: Score + meme-style verdict.
4. Zodiac Sticker Packs: PNGs + NFT mintable.
5. NFT Vault: Daily horoscopes, badges, compatibility NFTs.
6. Meme Feed (Optional): Community-generated zodiac memes.

Tech Stack & Partner Integration

Frontend: React (or Next.js), Tailwind CSS, Framer Motion

Backend: Node.js/Express or Firebase

Database: Firestore or Supabase

Partners:

- Goldsky: On-chain storage for roast history
- Sequence: Wallet login
- Thirdweb: NFT minting
- RedStone: Moon phases and real-time alerts

UI/UX Design (Figma Pages)

1. Home: Get My Sign, Compatibility, Horoscope
2. Zodiac Result Page: Sign, fun fact, roast
3. Horoscope: Toggle Vibe/Roast Mode
4. Compatibility Checker: Score + roast
5. NFT Vault: Minted items
6. Sticker Gallery: Download or mint

Zodiacverse: Project Blueprint

Backend Logic

Zodiac Logic: Use 'zodiac-sign' npm package or logic

Roast Generator: Random roast per sign from JSON

Horoscope: JSON/static text for MVP

Launch & Pitch Plan

MVP:

- DOB input to zodiac + roast
- Horoscope page
- Compatibility checker
- Sticker downloads
- Sequence login
- NFT via Thirdweb
- Host on Vercel

Pitch:

1. Problem + Solution
2. Features
3. Demo
4. Web3 tools
5. Vision
6. Closing quote

Checklist

- UI/UX Wireframes
- Content JSON
- Frontend setup
- Sequence login
- Thirdweb NFT

Zodiacverse: Project Blueprint

- RedStone alerts
- Stickers
- Vercel hosting
